## Front-End Web Developer

[diyarimohammed33@gmail.com](mailto:diyarimohammed33@gmail.com)

+964 7724326150

Ranya, Kurdistan

[Github](#)

I have been actively learning and working in the web development field for nearly 4 years. During the first two years, I focused on front-end development, with a strong expertise in React.js and its related libraries. Over the past few months, I have expanded my skill set by diving into back-end development, particularly with Node.js, Express.js, and MySQL. I have successfully created several simple projects, including a basic API, as I continue to build my full-stack development expertise.

## WORK EXPERIENCE

---

### **Lezzoo** – Backend Node JS Developer

June 2 – September 2

During my internship at Lezzoo, I gained valuable experience as a Backend Developer. I contributed to the development of the company's point-of-sale system and worked on a customized B2B solution for a restaurant. Through this experience, I honed my skills in , Node.js, Express.js, MySql, and RESTful APIs. I successfully tackled technical challenges, collaborated effectively with my team, and learned from industry experts.

## **[Gamezone](#)**

This project is a game zone website built with React.js and Redux.js. It allows users to browse a list of games, view game details. The project uses a variety of React.js features, including components, state management, and routing. It also uses Redux.js to manage the state of the application. Here are some of the features of the project: Browse games:

Users can browse a list of games by search for their name View game details:

Users can view details about a game, such as the game's description, screenshots, and ratings. The project is still under development, but it is a good example of how to use React.js and Redux.js to build a web application.

## **[Kurd.Movie](#)**

This project is a Kurd Movie website built with React.js and Redux.js. It allows users to browse a list of (Movies, Series, Animations) , view them in detail. The project uses a variety of React.js features, including components, state management, React Slick, Framer Motion, and routing. It also uses Redux.js to manage the state of the application. Here are some of the features of the project: Browse Movies:

1. Comprehensive Movie Database: users can watch and explore a wide range of content, including animations, movies, series, and their trailers. It offers detailed information about each title.
2. Genre-Based Filtering: sers can easily navigate through the vast collection of movies by genre. Whether they're in the mood for action, comedy, romance, or any other genre.

3. **Efficient Movie Search:** The project offers a convenient search feature that enables users to find movies quickly by their titles. By simply typing the name of a movie, users can access its detailed information, including trailers, synopsis, and reviews.

## My Portfolio

A portfolio website is an online platform that showcases an individual's or a company's work, skills, and achievements. It serves as a digital portfolio, allowing visitors to explore samples of past projects, testimonials, and contact information. A well-designed portfolio website typically includes sections for an introduction, a gallery of work, a resume or about me page, and a contact form to facilitate potential collaborations or job opportunities.

## CV Builder

I am a skilled React developer with a passion for creating user-friendly and efficient solutions. In my latest project, a CV builder, I leveraged Formik for seamless form management, integrated Ant Design for a sleek and intuitive user interface, and utilized Yup for robust form validation. The project is currently in progress, and one of its key features is the integration of React PDF to generate professional CV PDF files. As part of ongoing enhancements, I am actively working on incorporating the Kurdish language into the CV builder to make it more accessible and inclusive. Additionally, I am exploring options to introduce a variety of CV formats, providing users with diverse choices for presenting their professional profiles.

I am committed to delivering a high-quality and versatile CV builder that not only simplifies the resume creation process but also adapts to the unique preferences of users.

## Erbil Center

Noor Center Erbil, a website offering Quran recitation tools, a vast Islamic knowledge library, news updates, community forums, and the empowering ability to read, edit, and contribute Islamic eBooks, serves as your one-stop shop for learning and exploring Islam in Erbil. It's a team-work project, we used react.js for the front-end with newest react router version, also shadcn and many other libraries for better design, firebase as the database for our project, and

also want to mention that we're still working on that project, there are too many features to be done for the project !

To keep my CV concise, I have included a selection of key projects. For a complete list of my work and further details, please visit my portfolio.
