Diyari Mohammed Zrar

Front-End Web Developer

diyarimohammed33@gmail.com   +964 7724326150   Raniyah,Sulaymaniyah   LinkedIn   Github

I am a web developer with over two years of experience in the field. I have a strong knowledge of JavaScript, React.js, Redux , Tailwind CSS, HTML5, CSS3, and UI/UX Designer. I also have some experience with Express.js and Node.js. Currently, I am studying Information System Engineering at Erbil Polytechnic University and working on expanding my skillset. I am passionate about creating beautiful and functional websites that provide an excellent user experience.

Gamezone

This project is a game zone website built with React.js and Redux.js. It allows users to browse a list of games, view game details. The project uses a variety of React.js features, including components, state management, and routing. It also uses Redux.js to manage the state of the application. Here are some of the features of the project: Browse games:

Users can browse a list of games by search for their name View game details:

Users can view details about a game, such as the game's description, screenshots, and ratings. The project is still under development, but it is a good example of how to use React.js and Redux.js to build a web application.

Kurd.Movie

This project is a Kurd Movie website built with React.js and Redux.js. It allows users to browse a list of (Movies, Series, Animations) , view them in detail. The project uses a variety of React.js features, including components, state management, React Slick, Framer Motion, and routing. It also uses Redux.js to manage the state of the application. Here are some of the features of the project: Browse Movies:

1. Comprehensive Movie Database: users can watch and explore a wide range of content, including animations, movies, series, and their trailers. It offers detailed information about each title.
2. Genre-Based Filtering: sers can easily navigate through the vast collection of movies by genre. Whether they're in the mood for action, comedy, romance, or any other genre.
3. Efficient Movie Search: The project offers a convenient search feature that enables users to find movies quickly by their titles. By simply typing the name of a movie, users can access its detailed information, including trailers, synopsis, and reviews.

Shopping

This project is a Shopping website built with React.js and Redux.js. It allows users to see clothes for baby's and their prices. The project uses a variety of React.js features, including components, state management, and routing. It also uses Redux.js to manage the state of the application. Also this is project is for Tech Eye Company
