OBJECTIVE

Passionate and detail-oriented Web Developer with expertise in React.js, Node.js, and MySQL, seeking a full-time, part-time, or remote position to build high-quality, scalable, and efficient web applications. Dedicated to continuous learning, problem-solving, and contributing to innovative projects in dynamic team environments.

EDUCATION

Bachelor of Informtion System Engineering (November 2021 – May 2025)

Erbil Polytechnic University | Erbil Technical Computer and Informatics Engineering College

4th Stage

SKILLS

Programming Languages: JavaScript, HTML/CSS, Node JS.

Databases: MySql, Oracle.

Frameworks: React.js, Express.js.

Libraries: Redux.js, Knex.js, MUI, TailwindCSS, React Router…

Tools & Technologies: Git, Vercel.

Soft Skills: Problem-Solving, Teamwork, Communication, Time Management, Critical Thinking

RELEVANT EXPERIENCE

Backend Developer – Internship – (June 2024 – September 2024)

Lezzo

- **Backend Development at Lezzoo** – Contributed to the company's POS system and a custom B2B restaurant solution, gaining hands-on experience with Node.js, Express.js, MySQL, and RESTful APIs.
- **Problem-Solving & Collaboration** – Overcame technical challenges, worked closely with the team, and learned from industry experts to enhance my backend skills.

ACHIEVEMENTS & CERTIFICATIONS

Meta Front-End Developer Specialization - Meta

December 2023 – Present

I learned a lot in the meta front-end developer professional certificate 9 bundle courses from the wonderful teacher who had engaging tasks and thorough explanations from professionals. Ideal for someone serious in learning web development in-depth.

The Complete Full-Stack Web Development Bootcamp - Udemy

March 2021 – June 2023

I learned a lot in this course from the wonderful teacher who had engaging tasks and thorough explanations from professionals. Ideal for someone serious in learning web development in-depth.

Node.js, Express, MongoDB & More: The Complete Bootcamp - Udemy

June 2024 - Present

I learned a lot in this course from the wonderful teacher who had engaging tasks and thorough explanations from professionals. Ideal for someone serious in learning web development in-depth.

PERSONAL PROJECTS

My Portfolio

- **Portfolio Website Overview** – A portfolio website is a digital showcase of an individual's or company's work, skills, and achievements, featuring an introduction, project gallery, resume, and contact form to attract collaborations or job opportunities.

Node JS Hospital Management API

- **Hospital Management System Backend** – Developed a robust backend using Node.js, Express, and Knex.js to handle hospital operations efficiently. The system manages patients, doctors, appointments, and medical records with secure data handling and structured database management in MySQL.

- **Comprehensive API Development** – Created a RESTful API to support seamless communication between the frontend and backend, enabling efficient CRUD operations, authentication, role-based access control, and optimized performance for managing hospital workflows.

React Js Gamezone App

- **Game Zone Website with React & Redux** – A web app built with React.js and Redux.js, allowing users to browse games and view detailed information, including descriptions, screenshots, and ratings. It utilizes components, state management, and routing for a seamless experience.

- **State Management & Features** – Redux.js efficiently manages the application's state, enabling smooth game browsing and search functionality. The project is still in development but showcases best practices for building web applications with React and Redux.

React JS Kurd Movies App

- **Kurd Movie Website with React & Redux** – A platform built with React.js and Redux.js that lets users browse and explore movies, series, and animations. It features React Slick, Framer Motion, and routing for a dynamic and interactive experience.

- **Advanced Browsing & Search Features** – Users can filter movies by genre, search titles efficiently, and access detailed information, including trailers, synopses, and reviews, making content discovery seamless.

CV Builder

- **CV Builder with React** – Developed a CV builder using React, integrating Formik for form management, Ant Design for a sleek UI, and Yup for validation. The project also features React PDF to generate professional CV files.

- **Ongoing Enhancements & Localization** – Actively working on adding Kurdish language support and multiple CV formats to enhance accessibility and provide users with diverse presentation options.
